ESLBO English as a Second Language, Level 2

Course Outline

Course Title: English as a Second Language, Level 2, Open

Course Code: ESLBO

Grade: Level 2

Course Type: Open

Credit Value: 1.0

Prerequisite: None (Assessment Test)

Curriculum Policy Document: *English as a Second Language and English Literacy Development, The Ontario Curriculum, Grades 9 to 12, 2007*

Course Developer: Toronto eLearning School

Department: English as a Second Language

Department Head: Erin Weir, B.A.(Hon), B.Ed., OCT

Developed Date: 2020

Most Recent Revised Date: 2022

Course Description :

ESLBO - English as a Second Language, Level 2 extends students' listening, speaking, reading, and writing skills in English for everyday and academic purposes. Students will participate in conversations in structured situations on a variety of familiar and new topics; read a variety of texts designed or adapted for English language learners; expand their knowledge of English grammatical structures and sentence patterns; and link English sentences to compose paragraphs. The course also supports students' continuing adaptation to the Ontario school system.

| Unit | Course Content and Overall Curriculum Expectations | Time and Sequence |
|------|--|-------------------|
| 1 | <p>Canadian eh! Reading Comprehension and vocabulary study of short stories and <i>New Canadian Voices</i> Writing Paragraph writing, journals, summaries, Sentence structure and verb tenses Listening and Speaking Story telling from their own country using language structures correctly Socio-cultural Competence Ask teachers and peers questions for clarification and to obtain information Ability to work in groups Summative Evaluation Unit test on short story elements, comprehension and vocabulary</p> | 20 hours |
| 2 | <p>Short Stories/Folk Tales Reading Selection of short mystery stories Information texts, newspapers and research information on mysteries of the world Writing Informational paragraphs, note-taking and summaries using correct conventions of the English Language Listening and Speaking Viewing and responding to a video on real mysteries Oral presentation of research using language structures correctly Socio-cultural Competence and Media Literacy Communicate information about mysteries in the world Use school and community resources to support their learning, Media search for present day mysteries Summative Assessment Research project oral and written</p> | 20 hours |
| 3 | <p>Poetry Reading Analysis and comprehension and vocabulary study Socio-cultural Competence and Media Literacy Compare and contrast the traditions of a number of cultures, Suffixes and parts of speech Writing Diary writing, narratives and news report Listening and Speaking Oral presentations, dramatizations using language structures correctly Summative Assessment Paragraph writing and presentation from personal experience relating to the novel</p> | 20 hours |
| 4 | <p>Reading for Information Reading Read a variety of texts such as magazines, newspapers, and other articles for information and understanding Socio-cultural Competence and Media Literacy Read a variety of resources from other cultural organizations and perspectives Understand and compare diverse perspectives Writing Express their opinions in written format Comparative analysis of magazines, newspapers and other written forms with attention to tables, charts, diagrams Listening and Speaking Express their opinions verbally, View videos and websites Summative Assessment Informal assessment of student participation in class activities and discussions</p> | 30 hours |
| 5 | <p>Independent Study Reading Compare to 2 novels or short stories Socio-cultural Competence and Media Literacy Research using the internet and other resources to understand different perspectives Writing Define personal interests of each character such as sports, hobbies, music, etc. in a summary report Listening and Speaking Present a portion of your final report Summative Assessment Complete a final report or Digital Story Telling (DST)</p> | 18 hours |
| | Final Exam This is a proctored exam worth 30% of your final grade. | 2 hours |
| | Total | 110 hours |

Overall Curriculum Expectations: ESLBO

A. LISTENING AND SPEAKING

- A1. demonstrate the ability to understand, interpret, and evaluate spoken English for a variety of purposes;
- A2. use speaking skills and strategies to communicate in English for a variety of classroom and social purposes;
- A3. use correctly the language structures appropriate for this level to communicate orally in English.

B. READING

- B1. read and demonstrate understanding of a variety of texts for different purposes;
- B2. use a variety of reading strategies throughout the reading process to extract meaning from texts;
- B3. use a variety of strategies to build vocabulary;
- B4. locate and extract relevant information from written and graphic texts for a variety of purposes.

C. WRITING

- C1. write in a variety of forms for different purposes and audiences;
- C2. organize ideas coherently in writing;
- C3. use correctly the conventions of written English appropriate for this level, including grammar, usage, spelling, and punctuation;
- C4. use the stages of the writing process.

D. SOCIO-CULTURAL COMPETENCE AND MEDIA LITERACY

- D1. use English and non-verbal communication strategies appropriately in a variety of social contexts;
- D2. demonstrate an understanding of the rights and responsibilities of Canadian citizenship, and of the contributions of diverse groups to Canadian society;
- D3. demonstrate knowledge of and adaptation to the Ontario education system;
- D4. demonstrate an understanding of, interpret, and create a variety of media texts.

All course material is online, no textbook purchase required. Resources and references for course materials will be provided on course webpage. Students are expected to watch and read all lecture videos and reading materials provided, and complete relevant exercises at student's time of convenience.

Teaching / Learning Strategies

As in a conventional classroom, instructors employ a range of strategies for teaching a course:

- Clear writing that connects English to real life texts
- Examples of activities and opportunities to learn along the way
- Direct instruction and coaching on student work by the teacher

In addition, teachers and students have at their disposal a number of tools that are unique to electronic learning environments:

- Electronic simulation activities
- Video presentations
- Discussion boards and email
- Assessments with real-time feedback
- Interactive activities that engage both the student and teacher in the subject
- Peer review and assessment
- Internet Instructional Videos

All course material is online, no textbook is required. Assignments are submitted electronically. Tests are completed online at a time convenient for the student, and the course ends in a final exam which the student writes under the supervision of a proctor approved by Toronto eLearning School at a predetermined time and place. The final mark and report card are then forwarded to the student's home school.

Students must achieve the Ministry of Education learning expectations of a course and complete 110 hours of planned learning activities, both online and offline, in order to earn a course credit. Students must keep a learning log throughout their course which outlines the activities they have completed and their total learning hours. This log must be submitted before the final exam can be written.

The chart below indicates some general examples of online and offline activities.

| Online Learning Activities | Offline Learning Activities |
|--------------------------------------|---------------------------------|
| Watching instructional videos | Reading materials for course |
| Watching additional resources videos | Studying instructional material |
| Completing online timed assignments | Practicing skills |
| Contributing to Forums | Completing assignments |
| Uploading video presentations | Completing essays |
| Communicating with instructor | Preparing presentations |
| Participating in live conferences | Reviewing for tests and exams |
| Practicing through online quizzes | Researching topics on internet |
| Reviewing peer submissions | |
| Assessing peer presentations | |
| Completing online timed exam | |

Students are expected to access and participate actively in course work and course forums on a regular and frequent basis. This interaction with other students is a major component of this course and there are minimum requirements for student communication and contribution.

Assessment and Evaluation

Toronto eLearning School's approach to assessment and evaluation is based on the Ontario Ministry of Education's *Growing Success 2010* document. Assessment is the process of gathering information that accurately reflects how well a student is achieving the curriculum expectations in a subject or course.

The primary purpose of assessment is to improve student learning. Assessment for this purpose is seen as both "assessment for learning" and "assessment as learning". As part of assessment for learning, teachers provide students with descriptive feedback and coaching for improvement. Teachers engage in assessment as learning by helping all students develop their capacity to be independent, autonomous learners who are able to set individual goals, monitor their own progress, determine next steps, and reflect on their thinking and learning. TES teachers use evidence from a variety of sources in their assessment. These include formal and informal observations, discussions, conversations, questioning, assignments, projects, portfolios, self-assessments, self-reflections, essays, and tests.

Assessment occurs concurrently and seamlessly with instruction. Our courses contain multiple opportunities for students to obtain information about their progress and achievement, and to receive feedback that will help them improve their learning. Students can monitor their own success through the tracking of learning goals and success criteria throughout all courses.

Summative "assessment of learning" activities occur at or near the end of periods of learning. Evidence of student achievement for evaluation is also collected over time from different sources, such as discussions, conversations and observation of the development of the student's learning. Using multiple sources of evidence increases the reliability and validity of this evaluation. The evaluations are expressed as a percentage based upon the levels of achievement.

Strategies for Assessment and Evaluation of Student Performance

| Assessment as Learning | Assessment for Learning | Assessment of Learning |
|--|--|--|
| In all Units students can complete an online practice quiz on each lesson that tests their knowledge of fundamental facts and definitions. The quiz can be retaken as many times as needed and only the highest score is recorded. Students discover their areas of weakness and can take steps to improve on them. The student and instructor can then have a conversation on how best to assist the student's learning. | In all Units, students are expected to submit a mid-unit assignment directly to the instructor. The assignment provides a number of questions, problems, and activities balanced around the four categories of the Achievement Chart: Knowledge and Understanding, Thinking, Application, and Communication. The instructor grades each assignment and provides descriptive feedback and the student is asked to provide feedback on the feedback. | Each Unit ends with an assignment that is submitted directly to the instructor. A grade is recorded based on the Learning Goals and Success Criteria for that Unit. Students may be asked to resubmit parts of the assignment, or a modified assignment. |
| A Mid-Unit Assignment asks students to videotape themselves presenting solutions to various problems, or results of research, and post them to the forum for review by the instructor and selected peers. These comments and observations can be used to help the student assess their own listening and communicating skills, as well as their progress through the course. Feedback from both the instructor and the student can help the student advocate for their own learning. | Mid-Unit Video Presentation Assignments are used by the instructor as a form of diagnostic and formative assessment to help adjust instruction based on the needs of the student. It is another way the instructor gathers evidence for evaluating student performance. | At the end of each Unit, students complete an online test of the material. A grade is recorded and the instructor can initiate a conversation with the student if there are concerns. |
| Instructors communicate with their students through email or live chat sessions. Students can raise concerns and reflect on their own personal goals and learning during these one to one conversations with their instructors. | Occasionally instructors ask a student to post a solution to a unique problem designed for that student to the discussion forum, or to comment on the posting of another student. These activities become part of the student's grade under the category "Online Collaboration" and provide an opportunity for the instructor to provide feedback to the student. | At the end of the course, students complete a final exam that covers all the material studied in the course. |

Example of an Assessment Rubric for an Assignment in this Course

| | | | | |
|---|-------|---|---|---|
| Learning Goals | | | | |
| <ul style="list-style-type: none"> I will be able to identify correct writing conventions and errors in the work of mine and others. I will be able to utilize writing conventions to write and proofread my work | | | | |
| Success Criteria | Level | | | |
| | 1 | 2 | 3 | 4 |
| I can use grammar conventions to correctly communicate my intended meaning clearly | | | | |
| I can use punctuation correctly to communicate my intended meaning | | | | |
| I can use knowledge of spelling rules and patterns, several different types of resources and appropriate strategies to spell familiar and new words correctly | | | | |
| I can build vocabulary for writing by confirming word meanings and reviewing word choice | | | | |
| I can use appropriate decoding strategies to read and understand unfamiliar words | | | | |
| Teacher Feedback: | | | | |
| Student Feedback: | | | | |

[Growing Success](#) articulates the vision the Ministry has for the purpose and structure of assessment and evaluation techniques. There are seven fundamental principles that ensure best practices and procedures of assessment and evaluation by TES teachers. Assessment and evaluations:

1. are fair, transparent, and equitable for all students;
2. support all students, including those with special education needs, those who are learning the language of instruction (English or French), and those who are First Nation, Metis, or Inuit;
3. are carefully planned to relate to the curriculum expectations and learning goals and, as much as possible, to the interests, learning styles and preferences, needs, and experiences of all students;
4. are communicated clearly to students and parents at the beginning of the school year or course and at other appropriate points throughout the school year or course;
5. are ongoing, varied in nature, and administered over a period of time to provide multiple opportunities for students to demonstrate the full range of their learning;
6. provide ongoing descriptive feedback that is clear, specific, meaningful, and timely to support improved learning and achievement
7. develop students' self-assessment skills to enable them to assess their own learning, set specific goals, and plan next steps for their learning.

The Final Grade

The evaluation for this course is based on the student's achievement of curriculum expectations and the demonstrated skills required for effective learning. The percentage grade represents the quality of the student's overall achievement of the expectations for the course and reflects the corresponding level of achievement as described in the achievement chart for the discipline. A credit is granted and recorded for this course if the student's grade is 50% or higher. The final grade for this course will be determined as follows:

- 70% of the grade will be based upon evaluations conducted throughout the course. This portion of the grade will reflect the student's most consistent level of achievement throughout the course, although special consideration will be given to more recent evidence of achievement.
- 30% of the grade will be based on final assessment, which may be a final exam, a final project, or a combination of both an exam and a project.

The general balance of weighting of the categories of the achievement chart throughout the course is

| | |
|-----------------------------|-----|
| Knowledge and Understanding | 25% |
| Thinking | 25% |
| Communication | 25% |
| Application | 25% |

The Report Card

Two official report cards are issued - midterm and final. Each report card will focus on two distinct but related aspects of student achievement. First, the achievement of curriculum expectations is reported as a percentage grade. Additionally, the course median is reported as a percentage. The teacher will also provide written comments concerning the student's strengths, areas for improvement and next steps. Second, the learning skills are reported as a letter grade, representing one of four levels of accomplishment. The report cards contain separate sections for the reporting of these two aspects. The report card also indicates whether an OSSD credit has been earned.

Antidiscrimination Education in the English Program

The implementation of antidiscrimination principles in education influences all aspects of school life. It promotes a school climate that encourages all students to work to high standards, affirms the worth of all students, and helps them strengthen their sense of identity and develop a positive self-image. It encourages staff and students alike to value and show respect for diversity in the school and the wider society. It requires schools to adopt measures to provide a safe environment for learning, free from harassment, violence, and expressions of hate. Antidiscrimination education encourages students to think critically about themselves and others in the world around them in order to promote fairness, healthy relationships, and active, responsible citizenship. The ESL and ELD program provides many opportunities to support the principles relating to antidiscrimination education. The ESL and ELD program should enable students to recognize the contributions of various cultures to Canada including the unique role of Aboriginal people in the historical and cultural development of the country. The wealth of linguistic and cultural diversity in ESL

and ELD classrooms allows students to share information with each other about their own languages and cultures and about their experiences of their native countries and as newcomers to Canada. This will help students to develop a sense of personal identity and belonging. Teachers should seek to provide inclusive learning resources and materials representing diverse cultures, backgrounds, and experiences in order to reinforce students' self-identity. Both students and teachers should explore aspects of intercultural communication – for example, how different cultures interpret the use of eye contact and body language in conversation and during presentations. Teachers should be aware of global events that may affect students and that can also be used as opportunities for instruction.

Achievement Chart: Overall

The purpose of the achievement chart is to:

1. provide a common framework that encompasses all curriculum expectations for all courses;
2. guide the development of high-quality assessment tasks and tools;
3. help teachers plan instruction for learning;
4. assist teachers in providing meaningful feedback to students;
5. provide various categories/criteria with which to assess and evaluate students' learning.

The achievement chart provides a reference point for all assessment practice and a framework within which achievement will be assessed and evaluated.

1. The chart is organized into four broad criteria; Knowledge / Understanding, Thinking / Investigation, Communication, and Application.
2. The achievement chart describes the levels of achievement of the curriculum expectations within each subset of criteria.
3. The "descriptor" indicates the characteristic of performance, with respect to a particular criterion, on which assessment or evaluation is focused.
4. A specific "qualifier" is used to define each of the four levels of achievement. It is used along with a descriptor to produce a description of performance at a particular level.
5. The following table provides a summary description of achievement in each percentage grade range and corresponding level of achievement:

| A Summary Description of Achievement in Each Percentage Grade Range and Corresponding Level of Achievement | | |
|---|--------------------------|--|
| Percentage Grade Range | Achievement Level | Summary Description |
| 80-100% | Level 4 | A very high to outstanding level of achievement. Achievement is <i>above</i> the provincial standard. |
| 70-79% | Level 3 | A high level of achievement. Achievement is <i>at</i> the provincial standard. |
| 60-69% | Level 2 | A moderate level of achievement. Achievement is <i>below</i> , but <i>approaching</i> , the provincial standard. |
| 50-59% | Level 1 | A passable level of achievement. Achievement is <i>below</i> the provincial standard. |
| below 50% | Level R | Insufficient achievement of curriculum expectations. A credit will not be granted. |

Achievement Chart – ENGLISH AS A SECOND LANGUAGE AND ENGLISH LITERACY DEVELOPMENT, GRADES 9-12

| Categories | 50-59% (Level 1) | 60-69% (Level 2) | 70-79% (Level 3) | 80-100% (Level 4) |
|--|--|---|---|---|
| Knowledge and Understanding - Subject-specific content acquired in each course (knowledge), and the comprehension of its meaning and significance (understanding) | | | | |
| The student: | | | | |
| Knowledge of content (e.g., vocabulary, grammatical structures, punctuation, terminology, forms of text and media) | demonstrates limited knowledge of content | demonstrates some knowledge of content | demonstrates considerable knowledge of content | demonstrates thorough knowledge of content |
| Understanding of content (e.g., information and ideas, themes in novels and short stories, literary devices, language variety) | demonstrates limited understanding of content | demonstrates some understanding of content | demonstrates considerable understanding of content | demonstrates thorough and insightful understanding of content |
| Thinking - The use of critical and creative thinking skills and/or processes | | | | |
| The student: | | | | |
| Use of planning skills (e.g., focusing an inquiry, gathering information, organizing a project) | uses planning skills with limited effectiveness | uses planning skills with moderate effectiveness | uses planning skills with considerable effectiveness | uses planning skills with a high degree of effectiveness |
| Use of processing skills (e.g., selecting, analysing, generating, integrating, synthesizing, evaluating, forming conclusions) | uses processing skills with limited effectiveness | uses processing skills with some effectiveness | uses processing skills with considerable effectiveness | uses processing skills with a high degree of effectiveness |
| Use of critical/creative thinking processes (e.g., reading process, writing process, oral discourse, research) | uses critical / creative thinking processes with limited effectiveness | uses critical / creative thinking processes with some effectiveness | uses critical / creative thinking processes with considerable effectiveness | uses critical / creative thinking processes with a high degree of effectiveness |
| Communication - The conveying of meaning through various forms | | | | |
| The student: | | | | |
| Expression and organization of ideas and information in oral and visual forms (e.g., presentations, dialogues, discussions, role playing, debates, graphic texts, media works) and written forms (e.g., journals, notes, narratives, reports, resumes, stories, poems) | expresses and organizes ideas and information with limited effectiveness | expresses and organizes ideas and information with some effectiveness | expresses and organizes ideas and information with considerable effectiveness | expresses and organizes ideas and information with a high degree of effectiveness |
| Communication for different audiences and purposes in oral, visual, and written forms (e.g., use of English in socially and culturally appropriate ways) | communicates for different audiences and purposes with limited effectiveness | communicates for different audiences and purposes with some effectiveness | communicates for different audiences and purposes with considerable effectiveness | communicates for different audiences and purposes with a high degree of effectiveness |
| Use of conventions (e.g., grammatical structures, spelling, punctuation, style, usage), vocabulary, and terminology of the discipline in oral, visual, and written forms | uses conventions, vocabulary, and terminology of the discipline with limited effectiveness | uses conventions, vocabulary, and terminology of the discipline with some effectiveness | uses conventions, vocabulary, and terminology of the discipline with considerable effectiveness | uses conventions, vocabulary, and terminology of the discipline with a high degree of effectiveness |

| Application - The use of knowledge and skills to make connections within and between various contexts | | | | |
|--|--|---|---|---|
| | The student: | | | |
| Application of knowledge and skills (e.g., language knowledge, language learning strategies, reading strategies, vocabulary building strategies) in familiar contexts | applies knowledge and skills in familiar contexts with limited effectiveness | applies knowledge and skills in familiar contexts with some effectiveness | applies knowledge and skills in familiar contexts with considerable effectiveness | applies knowledge and skills in familiar contexts with a high degree of effectiveness |
| Transfer of knowledge and skills (e.g., language knowledge, language learning strategies, reading strategies, vocabulary building strategies) to new contexts | transfers knowledge and skills to new contexts with limited effectiveness | transfers knowledge and skills to new contexts with some effectiveness | transfers knowledge and skills to new contexts with considerable effectiveness | transfers knowledge and skills to new contexts with a high degree of effectiveness |
| Making connections within and between various contexts (e.g., between the language and the social and cultural environment, including the school; between learning English and becoming aware of citizen responsibilities, developing personal and career goals, and understanding cultural references in literature) | makes connections within and between various contexts with limited effectiveness | makes connections within and between various contexts with some effectiveness | makes connections within and between various contexts with considerable effectiveness | makes connections within and between various contexts with a high degree of effectiveness |

Note: A student whose achievement is below 50% at the end of a course will not obtain a credit for the course.

Resources required by students

- Access to ESLBO online course of study
- Access to a scanner or digital camera
- Access to a word-processing software
- Access to Google and various online resources
- Access to Youtube

Reference Texts

This course is entirely online and does not require or rely on any textbook.

Program Planning Considerations

Teachers who are planning a program in this subject will make an effort to take into account considerations for program planning that align with the Ontario Ministry of Education policy and initiatives in a number of important areas

1. Education for students with special education needs
2. Environmental education
3. Equity and inclusive education
4. Financial literacy education
5. Ontario First Nations, Metis, and Inuit education
6. Role of information and communications technology
7. English language learners
8. Career education
9. Cooperative education and other workplace experiences
10. Health and safety

1. Education for Students with Special Education Needs:

Toronto eLearning School is committed to ensuring that all students are provided with the learning opportunities and supports they require to gain the knowledge, skills, and confidence they need to succeed in a rapidly changing society. The context of special education and the provision of special education programs and services for exceptional students in Ontario are constantly evolving. Provisions included in the Canadian Charter of Rights and Freedoms and the Ontario Human Rights Code have driven some of these changes. Others have resulted from the evolution and sharing of best practices related to the teaching and assessment of students with special educational needs.

The provision of special education programs and services for students at Toronto eLearning School rests within a legal framework. The Education Act and the regulations related to it set out the legal responsibilities pertaining to special education. They provide comprehensive procedures for the identification of exceptional pupils, for the placement of those pupils in educational settings where the special education programs and services appropriate to their needs can be delivered, and for the review of the identification of exceptional pupils and their placement.

Teachers will take into account the needs of exceptional students as set out in the students' Individual Education Plan. The online courses offer a vast array of opportunities for students with special educational needs to acquire the knowledge and skills required for our evolving society. Students who use alternative techniques for communication may find a venue to

use these special skills in these courses. There are a number of technical and learning aids that can assist in meeting the needs of exceptional students as set out in their Individual Education Plan. In the process of taking their online course, students may use a personal amplification system, tela-typewriter (via Bell relay service), an oral or a sign-language interpreter, a scribe, specialized computer programs, time extensions, ability to change font size, oral readers, etc.

2. Environmental Education:

Environmental education teaches students about how the planet's physical and biological systems work, and how we can create a more sustainable future. Good curriculum design allows environmental issues and topics to be woven in and out of the online course content. This ensures that the student will have opportunities to acquire the knowledge, skills, perspectives and practices needed to become an environmentally literate citizen. The online course should provide opportunities for each student to address environmental issues in their home, in their local community, or even at the global level.

3. Equity and Inclusive Education:

Toronto eLearning School is taking important steps to reduce discrimination and embrace diversity in our online school in order to improve overall student achievement and reduce achievement gaps due to discrimination. The Ontario Equity and Inclusive Education Strategy was launched in April 2009 and states that all members of the Toronto eLearning School community are to be treated with respect and dignity. This strategy is helping Toronto eLearning School educators better identify and remove discriminatory biases and systemic barriers to student achievement. These barriers related to racism, sexism, homophobia and other forms of discrimination may prevent some students from reaching their full potential. The strategy supports the Ministry's key education priorities of high student achievement, reduced gaps in student achievement and increased accountability and public confidence in Ontario's schools. Students, regardless of their background or personal circumstances, must be given every opportunity to reach their full potential. Research shows that when students feel welcomed and accepted in their school, they are more likely to succeed academically. Toronto eLearning School desires to create a culture of high expectations where factors such as race, age, gender, sexual orientation and socio-economic status do not prevent students from achieving ambitious outcomes.

4. Financial Literacy Education:

Financial literacy may be defined as having the knowledge and skills needed to make responsible economic and financial decisions with competence and confidence. Since making financial decisions has become an increasingly complex task in the modern world, students need to have knowledge in various areas and a wide range of skills in order to make informed decisions about financial matters. Students need to be aware of risks that accompany various financial choices. They need to develop an understanding of world economic forces as well as ways in which they themselves can respond to those influences and make informed choices. Toronto eLearning School considers it essential that financial literacy be considered an important attribute of a well-educated population. In addition to acquiring knowledge in such specific areas as saving, spending, borrowing, and investing, students need to develop skills in problem solving, inquiry, decision making, critical thinking, and critical literacy related to financial and other issues. The goal is to help students acquire the knowledge and skills that will enable them to understand and respond to complex issues regarding their own personal finances and the finances of their families, as well as to develop an understanding of local and global effects of world economic forces and the social, environmental, and ethical implications of their own choices as consumers. The Ministry of Education and Toronto eLearning School are working to embed financial literacy expectations and opportunities in all courses as appropriate, as part of the ongoing curriculum review process.

5. Ontario First Nations, Metis, and Inuit Education:

First Nation, Metis, and Inuit students in Ontario will need to have the knowledge, skills, and confidence they need to successfully complete their elementary and secondary education in order to pursue postsecondary education or training and/or to enter the workforce. They will need to have the traditional and contemporary knowledge, skills, and attitudes required to be socially contributive, politically active, and economically prosperous citizens of the world. All students in Ontario will need to have knowledge and appreciation of contemporary and traditional First Nation, Metis, and Inuit traditions, cultures, and perspectives. Toronto eLearning School and the Ministry of Education are committed to First Nation, Metis, and Inuit student success. TES teachers are committed to (1) developing strategies that will increase the capacity of the education system to respond to the learning and cultural needs of First Nation, Metis, and Inuit students; (2) providing quality programs, services, and resources to help create learning opportunities for First Nation, Metis, and Inuit students that support improved academic achievement and identity building; (3) providing a curriculum that facilitates learning about contemporary and traditional First Nation, Metis, and Inuit cultures, histories, and perspectives among all students where possible; and (4) developing and implementing strategies that facilitate increased participation by First Nation, Metis, and Inuit parents, students, communities, and organizations in working to support the academic success of the student.

6. The Role of Information and Communications Technology in the Curriculum.

Information literacy is the ability to access, select, gather, critically evaluate, and create information. Communication literacy refers to the ability to communicate information and to use the information obtained to solve problems and make decisions. Information and communications technologies are utilized by all TES students when the situation is appropriate within their online course. As a result, students will develop transferable skills through their experience with word processing, internet research, presentation software, and telecommunication tools, as would be expected in any other course or any business environment.

7. English Language Learners:

This Toronto eLearning School online course can provide a wide range of options to address the needs of ESL/ELD students. This online course must be flexible in order to accommodate the needs of students who require instruction in English as a second language or English literacy development. The TES teacher considers it to be their responsibility to

help students develop their ability to use the English language properly. Appropriate modifications to teaching, learning, and evaluation strategies in this course may be made in order to help students gain proficiency in English, since students taking English as a second language at the secondary level have limited time in which to develop this proficiency. This online course can provide a wide range of options to address the needs of ESL/ELD students. Well written content will aid ESL students in mastering not only the content of this course, but as well, the English language and all of its idiosyncrasies. Toronto eLearning School has created course content to enrich the student's learning experience. In addition, since many occupations in Canada require employees with capabilities in the English language, many students will learn English language skills which can contribute to their success in the larger world.

8. Career Education:

As the online student progresses through their online course, their teacher is available to help the student prepare for employment in a huge number of diverse areas. With the help of their teacher, students will learn to set and achieve goals and will gain experience in making meaningful decisions concerning their career choices. The skills, knowledge and creativity that students acquire through this online course are essential for a wide range of careers. Throughout their secondary school education, students will learn about the educational and career opportunities that are available to them; explore and evaluate a variety of those opportunities; relate what they learn in their courses to potential careers in a variety of fields; and learn to make appropriate educational and career choices.

9. Cooperative Education and Other Workplace Experiences:

By applying the skills they have developed, students will readily connect their classroom learning to real-life activities in the world in which they live. Cooperative education and other workplace experiences will broaden their knowledge of employment opportunities in a wide range of fields. In addition, students will increase their understanding of workplace practices and the nature of the employer-employee relationship. TES teachers will try to help students link to Ministry programs to ensure that students have information concerning programs and opportunities.

10. Health and Safety:

Students who are recent arrivals from other countries may need special health and safety information while they are learning the language of instruction. The ESL and ELD program should include health and safety topics, especially in Level 1 and 2 courses. For example, students should learn to read warning signs and notices and respond appropriately to them, and should be made familiar with emergency procedures at school and in the community. Some newcomer students who are adjusting to new foods and ways of buying, storing, and preparing food need information about nutrition and food shopping (e.g., expiry dates, nutritional labelling). Other topics that should be covered include appropriate names for parts of the body and biological processes, and health-care services. It is important to value cultural differences in these areas while ensuring that students receive key information related to their health and well-being.
