HHS4U Families in Canada, Grade 12

Course Outline

Course Title: Families in Canada, Grade 12

Course Code: HHS4U

Grade: 12

Course Type: University Preparation

Credit Value: 1.0

Prerequisite: Any university or university / college preparation course in Social Sciences and Humanities, English, or Canadian and World Studies.

Curriculum Policy Document: Social Sciences and Humanities, The Ontario Curriculum, Grades 9 to 12, 2013 (Revised)

Course Developer: Toronto eLearning School

Department: Social Sciences and Humanities

Department Head: Erin Weir, B.A.(Hon), B.Ed., OCT

Developed Date: 2020

Most recent Revised Date: 2022

Course Description :

HHS4U - Families in Canada 12 enables students to draw on sociological, psychological, and anthropological theories and research to analyze the development of individuals, intimate relationships, and family and parent-child relationships. Students will focus on issues and challenges facing individuals and families in Canada's diverse society. They will develop analytical tools that enable them to assess various factors affecting families and to consider policies and practices intended to support families in Canada. In HHS4U online, students will develop the investigative skills required to conduct and communicate the results of research on individuals, intimate relationships, and parent-child relationships.

OUTLINE OF COURSE CONTENT

Unit	Unit Titles and Descriptions	Length
1	<p>Unit 1 - The Concept of Family</p> <p>In this unit students will learn what family is. They will be introduced to sociological theories and begin to apply them to the concept of family. They will learn about the history of the family and what impacts family structure. They will look at both their own families as well as the idea of family around the world.</p>	24 hours
2	<p>Unit 2 - Adolescence to Adulthood</p> <p>In this unit students will begin to understand theories of development and the difference between the stages of adolescence and adulthood. They will look at research that compares brain development and come to analyze the stages of these different periods of development. They will come to understand that development and decisions made in adolescence will impact their adult lives.</p>	25 hours
	<p>Midterm Assignment</p> <p>This is a Midterm Assignment worth 10% of your final grade.</p>	3 hours
3	<p>Unit 3 - Developing Intimate Relationships</p> <p>In this unit students will examine how relationships are formed and maintained. They will look at sex, gender and socialization and how these concepts are created and interconnected. Students will come to identify signs of an unhealthy relationships and problem solve for these types of situations. Finally, they will come to understand the institution of marriage and what long lasting relationships entail.</p>	26 hours
4	<p>Unit 4 - Parenting and Child Rearing</p> <p>In this final unit, students will build an understanding of various theories involved in parenting and child rearing. Students will study different theories surrounding raising children and will research trends in child rearing throughout the world. Students will create their own research premises to identify how fertility compares between various countries in the world.</p>	25 hours
5/td>	<p>Final Culminating Activity</p> <p>This is a Final Culminating Assignment worth 10% of your final grade. .</p>	4 hours
	<p>Final Exam</p> <p>This is a proctored exam worth 20% of your final grade. .</p>	3 hours
	Total	110 hours

Overall Curriculum Expectations

A. RESEARCH AND INQUIRY SKILLS

- A1 **Exploring:** explore topics related to families in Canada, and formulate questions to guide their research;
- A2 **Investigating:** create research plans, and locate and select information relevant to their chosen topics, using appropriate social science research and inquiry methods;
- A3 **Processing Information:** assess, record, analyse, and synthesize information gathered through research and inquiry;
- A4 **Communicating and Reflecting:** communicate the results of their research and inquiry clearly and effectively, and reflect on and evaluate their research, inquiry, and communication skills.

B. THEORETICAL PERSPECTIVES ON DEVELOPMENT

- B1 **Individual Development:** demonstrate an understanding of theoretical perspectives and research on various aspects of individual development;
- B2 **The Development of Intimate Relationships:** demonstrate an understanding of theoretical perspectives and research on the development of intimate relationships;
- B3 **The Development of Family and Parent-Child Relationships:** demonstrate an understanding of theoretical perspectives and research on the development of family and parent-child relationships.

C. THE IMPACT OF NORMS, ROLES, AND INSTITUTIONS

- C1 **The Effects on Individuals:** demonstrate an understanding of the impact of norms, roles, and social institutions on individuals throughout the lifespan;
- C2 **The Effects on Intimate Relationships:** demonstrate an understanding of the impact of norms, roles, and social institutions on intimate relationships;
- C3 **The Effects on Family and Parent-Child Relationships:** demonstrate an understanding of factors that can affect decisions about whether to have and how to care for children, and of the impact of norms, roles, and social institutions on family and parent-child relationships.

D. TRENDS, ISSUES, AND CHALLENGES

- D1 **Trends and Challenges for Individuals:** demonstrate an understanding of demographic trends related to the lives of individuals and of the impact of social issues and challenges on individual development;
- D2 **Trends and Challenges in Intimate Relationships:** demonstrate an understanding of demographic and social trends and issues related to intimate relationships and of strategies for responding to challenges in those relationships;
- D3 **Trends and Challenges in the Family and in Parent-Child Relationships:** demonstrate an understanding of demographic trends related to the family and to parent-child relationships and of the impact of social issues and challenges on family development.

Teaching / Learning Strategies:

As in a conventional classroom, instructors employ a range of strategies for teaching a course:

- Basic notes and definitions that explain concepts and provide examples
- Direct instruction and coaching on student work by the teacher
- Using lesson assignments to explore different sources and develop critical thinking skills

In addition, teachers and students have at their disposal a number of tools that are unique to electronic learning environments:

- Electronic simulation activities
- Video presentations
- Discussion boards and email
- Assessments with real-time feedback
- Interactive activities that engage both the student and teacher in the subject
- Peer review and assessment
- Internet Instructional Videos

All course material is online, no textbook is required. Assignments are submitted electronically. Tests are completed online at a time convenient for the student, and the course ends in a final exam which the student writes under the supervision of a proctor approved by Toronto eLearning School at a predetermined time and place. The final mark and report card are then forwarded to the student's home school.

Students must achieve the Ministry of Education learning expectations of a course and complete 110 hours of planned learning activities, both online and offline, in order to earn a course credit. Students must keep a learning log throughout their course which outlines the activities they have completed and their total learning hours. This log must be submitted before the final exam can be written.

The chart below indicates some general examples of online and offline activities.

Online Learning Activities	Offline Learning Activities
Watching instructional videos	Reading materials for course
Watching additional resources videos	Studying instructional material
Completing online timed assignments	Practicing skills
Contributing to Forums	Completing assignments
Uploading video presentations	Completing essays
Communicating with instructor	Preparing presentations
Participating in live conferences	Reviewing for tests and exams
Practicing through online quizzes	Researching topics on internet
Reviewing peer submissions	
Assessing peer presentations	
Completing online timed exam	

Students are expected to access and participate actively in course work and course forums on a regular and frequent basis. This interaction with other students is a major component of this course and there are minimum requirements for student communication and contribution.

Assessment and Evaluation

Toronto eLearning School's approach to assessment and evaluation is based on the Ontario Ministry of Education's *Growing Success 2010* document. Assessment is the process of gathering information that accurately reflects how well a student is achieving the curriculum expectations in a subject or course.

The primary purpose of assessment is to improve student learning. Assessment for this purpose is seen as both "assessment for learning" and "assessment as learning". As part of assessment for learning, teachers provide students with descriptive feedback and coaching for improvement. Teachers engage in assessment as learning by helping all students develop their capacity to be independent, autonomous learners who are able to set individual goals, monitor their own progress, determine next steps, and reflect on their thinking and learning. Toronto eLearning School teachers use evidence from a variety of sources in their assessment. These include formal and informal observations, discussions, conversations, questioning, assignments, projects, portfolios, self-assessments, self-reflections, essays, and tests.

Assessment occurs concurrently and seamlessly with instruction. Our courses contain multiple opportunities for students to obtain information about their progress and achievement, and to receive feedback that will help them improve their learning. Students can monitor their own success through the tracking of learning goals and success criteria throughout all courses.

Summative "assessment of learning" activities occur at or near the end of periods of learning. Evidence of student achievement for evaluation is also collected over time from different sources, such as discussions, conversations and observation of the development of the student's learning. Using multiple sources of evidence increases the reliability and validity of this evaluation. The evaluations are expressed as a percentage based upon the levels of achievement.

Strategies for Assessment and Evaluation of Student Performance

Assessment as Learning	Assessment for Learning	Assessment of Learning
<p>During each unit, students are asked to keep a log of new terminology they learn throughout the lessons and are asked to define that terminology. This will be a record of what students have learned, and provides a reference point for questions to ask the instructor, and a study guide when it comes to the final examination</p>	<p>Each unit will have a collection of texts that students are required to read, and each lesson will end with a set of questions to determine whether the student has a grasp on the knowledge needed to succeed in the course.</p>	<p>Two formal written assignments are distributed at various points in the course to assess the student's learning on many of the topics studied during lessons. This assignment allows the instructor to see and assess the student's ability to make further connections across texts.</p>
<p>Revising and editing written work is a large aspect of the course, which allows students to correct thinking, expand ideas, and change topics if necessary. Collaborative work between students when it comes to editing and revising is encouraged and suggested as a necessary component to the course.</p>	<p>Peer reviews and instructor consultations are a useful tool for students to assess their own ability to communicate thoughts and ideas, allowing them clarity on which aspects of the course they need to put more focus in.</p>	<p>A mid-term assignment will be distributed to students to assess their Knowledge and Understanding, as well as a summative assignment, which will both act as a way for students to demonstrate their ability to understand and make connections across several different texts.</p>
<p>Students will be utilizing the discussion forums to discuss work and ideas throughout the course, as well as having access to the instructor's email address for any further concerns.</p>	<p>Discussion forums are not only used for discussion, but also as a way to check in on a student's understanding, and to provide a gateway to resources that will aid in their learning and help them to be successful in the course.</p>	<p>The final examination will be the final assessment of the course, and will allow students to demonstrate their understanding of the covered content in the course.</p>

Example of an Assessment Rubric for an Assignment in this course

CATEGORY	Level 4	Level 3	Level 2	Level 1
Knowledge and Understanding Effectiveness	Project includes all material needed to gain a comfortable understanding of the topic.	Project includes most material needed to gain a comfortable understanding of the material but is lacking one or two key elements.	Project is missing more than two key elements.	Project is lacking several key elements and has inaccuracies.
Application Sequencing of Information	Information is organized in a clear, logical way. It is easy to anticipate the type of material that might be on the next slide.	Most information is organized in a clear, logical way. One slide or item of information seems out of place.	Some information is logically sequenced. An occasional slide or item of information seems out of place.	There is no clear plan for the organization of information.
Thinking and Inquiry Originality	Presentation shows considerable originality and inventiveness. The content and ideas are presented in a unique and interesting way.	Presentation shows some originality and inventiveness. The content and ideas are presented in an interesting way.	Presentation shows an attempt at originality and inventiveness on 1-2 slides.	Presentation is a rehash of other people's ideas and/or graphics and shows very little attempt at original thought.
Communication Spelling and Grammar	Presentation has no misspellings or grammatical errors.	Presentation has 1-2 misspellings, but no grammatical errors.	Presentation has 1-2 grammatical errors but no misspellings.	Presentation has more than 2 grammatical and/or spelling errors.
Communication Use of Graphics	All graphics are attractive (size and colors) and support the theme/content of the presentation.	A few graphics are not attractive but all support the theme/content of the presentation.	All graphics are attractive but a few do not seem to support the theme/content of the presentation.	Several graphics are unattractive AND detract from the content of the presentation.

[Growing Success](#) articulates the vision the Ministry has for the purpose and structure of assessment and evaluation techniques. There are seven fundamental principles that ensure best practices and procedures of assessment and evaluation by Toronto eLearning School teachers. Assessment and evaluations:

1. are fair, transparent, and equitable for all students;
2. support all students, including those with special education needs, those who are learning the language of instruction (English or French), and those who are First Nation, Metis, or Inuit;
3. are carefully planned to relate to the curriculum expectations and learning goals and, as much as possible, to the interests, learning styles and preferences, needs, and experiences of all students;
4. are communicated clearly to students and parents at the beginning of the school year or course and at other appropriate points throughout the school year or course;
5. are ongoing, varied in nature, and administered over a period of time to provide multiple opportunities for students to demonstrate the full range of their learning;

6. provide ongoing descriptive feedback that is clear, specific, meaningful, and timely to support improved learning and achievement
7. develop students self-assessment skills to enable them to assess their own learning, set specific goals, and plan next steps for their learning.

The Final Grade

The evaluation for this course is based on the student's achievement of curriculum expectations and the demonstrated skills required for effective learning. The percentage grade represents the quality of the student's overall achievement of the expectations for the course and reflects the corresponding level of achievement as described in the achievement chart for the discipline. A credit is granted and recorded for this course if the student's grade is 50% or higher. The final grade for this course will be determined as follows:

- 70% of the grade will be based upon evaluations conducted throughout the course. This portion of the grade will reflect the student's most consistent level of achievement throughout the course, although special consideration will be given to more recent evidence of achievement.
- 30% of the grade will be based on a final assessment, which may be a final exam, a final project, or a combination of both an exam and a project.

Final Grade Weight Breakdown

10%	Contributions to Discussion Forum
50%	Unit Lesson Assignments
10%	Mid Term Assignment
10%	Final Culminating
20%	Final Exam

The general balance of weighting of the categories of the achievement chart throughout the course is

Knowledge and Understanding	25%
Thinking	25%
Communication	25%
Application	25%

The Report Card

Two official report cards are issued - midterm and final. Each report card will focus on two distinct but related aspects of student achievement. First, the achievement of curriculum expectations is reported as a percentage grade. Additionally, the course median is reported as a percentage. The teacher will also provide written comments concerning the student's strengths, areas for improvement and next steps. Second, the learning skills are reported as a letter grade, representing one of four levels of accomplishment. The report cards contain separate sections for the reporting of these two aspects. The report card also indicates whether an OSSD credit has been earned.

The Achievement Chart: Overall

The purpose of the achievement chart is to:

1. provide a common framework that encompasses all curriculum expectations for all courses;
2. guide the development of high-quality assessment tasks and tools;
3. help teachers plan instruction for learning;
4. assist teachers in providing meaningful feedback to students;
5. provide various categories/criteria with which to assess and evaluate students' learning.

The achievement chart provides a reference point for all assessment practice and a framework within which achievement will be assessed and evaluated.

1. The chart is organized into four broad criteria; Knowledge / Understanding, Thinking / Investigation, Communication, and Application.
2. The achievement chart describes the levels of achievement of the curriculum expectations within each subset of criteria.
3. The "descriptor" indicates the characteristic of performance, with respect to a particular criterion, on which assessment or evaluation is focused.
4. A specific "qualifier" is used to define each of the four levels of achievement. It is used along with a descriptor to produce a description of performance at a particular level.
5. The following table provides a summary description of achievement in each percentage grade range and corresponding level of achievement:

A Summary Description of Achievement in Each Percentage Grade Range and Corresponding Level of Achievement		
Percentage Grade Range	Achievement Level	Summary Description
80-100%	Level 4	A very high to outstanding level of achievement. Achievement is <i>above</i> the provincial standard.
70-79%	Level 3	A high level of achievement. Achievement is <i>at</i> the provincial standard.
60-69%	Level 2	A moderate level of achievement. Achievement is <i>below</i> , but <i>approaching</i> , the provincial standard.
50-59%	Level 1	A passable level of achievement. Achievement is <i>below</i> the provincial standard.
below 50%	Level R	Insufficient achievement of curriculum expectations. A credit will not be granted.

Achievement Chart – Canadian and World Studies, Grades 9–12

Knowledge and Understanding - Subject-specific content acquired in each course (knowledge), and the comprehension of its meaning and significance (understanding)				
	The student:			
Knowledge of content (e.g., facts, terms, definitions, safe practices and procedures, use of technologies)	demonstrates limited knowledge of content	demonstrates some knowledge of content	demonstrates considerable knowledge of content	demonstrates thorough knowledge of content
Understanding of content (e.g., concepts, theories, ideas, processes; relationship between theory and action)	demonstrates limited understanding of content	demonstrates some understanding of content	demonstrates considerable understanding of content	demonstrates thorough and insightful understanding of content
Thinking - The use of critical and creative thinking skills and/or processes				
	The student:			
Use of planning skills (e.g., formulating questions, identifying problems, generating ideas, gathering and organizing information, focusing research, selecting strategies)	uses planning skills with limited effectiveness	uses planning skills with moderate effectiveness	uses planning skills with considerable effectiveness	uses planning skills with a high degree of effectiveness
Use of processing skills (e.g., analysing, detecting point of view and bias, interpreting, evaluating, synthesizing, forming conclusions)	uses processing skills with limited effectiveness	uses processing skills with some effectiveness	uses processing skills with considerable effectiveness	uses processing skills with a high degree of effectiveness
Use of critical/creative thinking processes (e.g., goal setting, decision making, problem solving, invention, critiquing, reviewing)	uses critical / creative thinking processes with limited effectiveness	uses critical / creative thinking processes with some effectiveness	uses critical / creative thinking processes with considerable effectiveness	uses critical / creative thinking processes with a high degree of effectiveness
Communication - The conveying of meaning through various forms				
	The student:			
Organization and expression of ideas, information, and understandings in oral, visual, and/or written forms (e.g., oral: role plays, interviews, presentations, debates; visual: demonstrations, multimedia presentations, posters, graphic organizers; written: pamphlets, journals, reports, web pages)	organizes and expresses ideas, information, and understandings with limited effectiveness	organizes and expresses ideas, information, and understandings with some effectiveness	organizes and expresses ideas, information, and understandings with considerable effectiveness	organizes and expresses ideas, information, and understandings with a high degree of effectiveness
Communication for different audiences (e.g., peers, adults, younger children, community members) and purposes (e.g., to inform, instruct, persuade) in oral, visual, and/or written forms	communicates for different audiences and purposes with limited effectiveness	communicates for different audiences and purposes with some effectiveness	communicates for different audiences and purposes with considerable effectiveness	communicates for different audiences and purposes with a high degree of effectiveness

Use of conventions (e.g., research conventions such as surveys, documentation conventions, communication conventions), vocabulary, and terminology of the discipline in oral, visual, and/or written forms	uses conventions, vocabulary, and terminology of the discipline with limited effectiveness	uses conventions, vocabulary, and terminology of the discipline with some effectiveness	uses conventions, vocabulary, and terminology of the discipline with considerable effectiveness	uses conventions, vocabulary, and terminology of the discipline with a high degree of effectiveness
Application - The use of knowledge and skills to make connections within and between various contexts				
	The student:			
Application of knowledge and skills (e.g., concepts, procedures, processes, methodologies, technologies) in familiar contexts	applies knowledge and skills in familiar contexts with limited effectiveness	applies knowledge and skills in familiar contexts with some effectiveness	applies knowledge and skills in familiar contexts with considerable effectiveness	applies knowledge and skills in familiar contexts with a high degree of effectiveness
Transfer of knowledge and skills to new contexts (e.g., other subjects; experiences in the family, community, society; using theory to help understand personal experiences)	transfers knowledge and skills to new contexts with limited effectiveness	transfers knowledge and skills to new contexts with some effectiveness	transfers knowledge and skills to new contexts with considerable effectiveness	transfers knowledge and skills to new contexts with a high degree of effectiveness
Making connections within and between various contexts (e.g., past, present, future; environmental, personal, social, religious, cultural, socio-economic contexts)	makes connections within and between various contexts with limited effectiveness	makes connections within and between various contexts with some effectiveness	makes connections within and between various contexts with considerable effectiveness	makes connections within and between various contexts with a high degree of effectiveness

Note: A student whose achievement is below 50% at the end of a course will not obtain a credit for the course.

Resources required by students

- Access to HHS4U online course of study
- Access to a scanner or digital camera
- Access to a spreadsheet and word-processing software
- Access to an online graphing calculator
- Access to Youtube

Reference Texts

Note: This course is entirely online and does not require or rely on any textbook. Should students wish to seek additional information we would recommend this texts:

Program Planning Considerations

Teachers who are planning a program in this subject will make an effort to take into account considerations for program planning that align with the Ontario Ministry of Education policy and initiatives in a number of important areas

1. Education for students with special education needs
2. Environmental education
3. Equity and inclusive education
4. Financial literacy education
5. Ontario First Nations, Metis, and Inuit education
6. Role of information and communications technology
7. English language learners
8. Career education
9. Cooperative education and other workplace experiences
10. Health and safety

1. Education for Students with Special Education Needs:

Toronto eLearning School is committed to ensuring that all students are provided with the learning opportunities and supports they require to gain the knowledge, skills, and confidence they need to succeed in a rapidly changing society. The context of special education and the provision of special education programs and services for exceptional students in Ontario are constantly evolving. Provisions included in the Canadian Charter of Rights and Freedoms and the Ontario Human Rights Code have driven some of these changes. Others have resulted from the evolution and sharing of best practices related to the teaching and assessment of students with special educational needs.

The provision of special education programs and services for students at Toronto eLearning School rests within a legal framework. The Education Act and the regulations related to it set out the legal responsibilities pertaining to special education. They provide comprehensive procedures for the identification of exceptional pupils, for the placement of those pupils in educational settings where the special education programs and services appropriate to their needs can be delivered, and for the review of the identification of exceptional pupils and their placement.

Teachers will take into account the needs of exceptional students as set out in the students' Individual Education Plan. The online courses offer a vast array of opportunities for students with special education needs to acquire the knowledge and skills required for our evolving society. Students who use alternative techniques for communication may find a venue to

use these special skills in these courses. There are a number of technical and learning aids that can assist in meeting the needs of exceptional students as set out in their Individual Education Plan. In the process of taking their online course, students may use a personal amplification system, tela-typewriter (via Bell relay service), an oral or a sign-language interpreter, a scribe, specialized computer programs, time extensions, ability to change font size, oral readers, etc.

2. Environmental Education:

Environmental education teaches students about how the planet's physical and biological systems work, and how we can create a more sustainable future. Good curriculum design allows environmental issues and topics to be woven in and out of the online course content. This ensures that the student will have opportunities to acquire the knowledge, skills, perspectives and practices needed to become an environmentally literate citizen. The online course should provide opportunities for each student to address environmental issues in their home, in their local community, or even at the global level.

3. Equity and Inclusive Education:

Toronto eLearning School is taking important steps to reduce discrimination and embrace diversity in our online school in order to improve overall student achievement and reduce achievement gaps due to discrimination. The Ontario Equity and Inclusive Education Strategy was launched in April 2009 and states that all members of the Toronto eLearning School community are to be treated with respect and dignity. This strategy is helping Toronto eLearning School educators better identify and remove discriminatory biases and systemic barriers to student achievement. These barriers related to racism, sexism, homophobia and other forms of discrimination may prevent some students from reaching their full potential. The strategy supports the Ministry's key education priorities of high student achievement, reduced gaps in student achievement and increased accountability and public confidence in Ontario's schools. Students, regardless of their background or personal circumstances, must be given every opportunity to reach their full potential. Research shows that when students feel welcomed and accepted in their school, they are more likely to succeed academically. Toronto eLearning School desires to create a culture of high expectations where factors such as race, age, gender, sexual orientation and socio-economic status do not prevent students from achieving ambitious outcomes.

4. Financial Literacy Education:

Financial literacy may be defined as having the knowledge and skills needed to make responsible economic and financial decisions with competence and confidence. Since making financial decisions has become an increasingly complex task in the modern world, students need to have knowledge in various areas and a wide range of skills in order to make informed decisions about financial matters. Students need to be aware of risks that accompany various financial choices. They need to develop an understanding of world economic forces as well as ways in which they themselves can respond to those influences and make informed choices. Toronto eLearning School considers it essential that financial literacy be considered an important attribute of a well-educated population. In addition to acquiring knowledge in such specific areas as saving, spending, borrowing, and investing, students need to develop skills in problem solving, inquiry, decision making, critical thinking, and critical literacy related to financial and other issues. The goal is to help students acquire the knowledge and skills that will enable them to understand and respond to complex issues regarding their own personal finances and the finances of their families, as well as to develop an understanding of local and global effects of world economic forces and the social, environmental, and ethical implications of their own choices as consumers. The Ministry of Education and Toronto eLearning School are working to embed financial literacy expectations and opportunities in all courses as appropriate, as part of the ongoing curriculum review process.

5. Ontario First Nations, Metis, and Inuit Education:

First Nation, Metis, and Inuit students in Ontario will need to have the knowledge, skills, and confidence they need to successfully complete their elementary and secondary education in order to pursue postsecondary education or training and/or to enter the workforce. They will need to have the traditional and contemporary knowledge, skills, and attitudes required to be socially contributive, politically active, and economically prosperous citizens of the world. All students in Ontario will need to have knowledge and appreciation of contemporary and traditional First Nation, Metis, and Inuit traditions, cultures, and perspectives. Toronto eLearning School and the Ministry of Education are committed to First Nation, Metis, and Inuit student success. Toronto eLearning School teachers are committed to (1) developing strategies that will increase the capacity of the education system to respond to the learning and cultural needs of First Nation, Metis, and Inuit students; (2) providing quality programs, services, and resources to help create learning opportunities for First Nation, Metis, and Inuit students that support improved academic achievement and identity building; (3) providing a curriculum that facilitates learning about contemporary and traditional First Nation, Metis, and Inuit cultures, histories, and perspectives among all students where possible; and (4) developing and implementing strategies that facilitate increased participation by First Nation, Metis, and Inuit parents, students, communities, and organizations in working to support the academic success of the student.

6. The Role of Information and Communications Technology in the Curriculum.

Information literacy is the ability to access, select, gather, critically evaluate, and create information. Communication literacy refers to the ability to communicate information and to use the information obtained to solve problems and make decisions. Information and communications technologies are utilized by all Toronto eLearning School students when the situation is appropriate within their online course. As a result, students will develop transferable skills through their experience with word processing, internet research, presentation software, and telecommunication tools, as would be expected in any other course or any business environment.

7. English Language Learners:

This Toronto eLearning School online course can provide a wide range of options to address the needs of ESL/ELD students. This online course must be flexible in order to accommodate the needs of students who require instruction in English as a second language or English literacy development. The Toronto eLearning School teacher considers it to be their responsibility to help students develop their ability to use the English language properly. Appropriate modifications to teaching, learning, and evaluation strategies in this course may be made in order to help students gain proficiency in English, since students taking English as a second language at the secondary level have limited time in which to develop this proficiency. This online course can provide a wide range of options to address the needs of ESL/ELD students. Well written content will aid ESL students in mastering not only the content of this course, but as well, the English language and all of its idiosyncrasies. Toronto eLearning School has created course content to enrich the student's learning experience. In addition, since many occupations in Canada require employees with capabilities in the

English language, many students will learn English language skills which can contribute to their success in the larger world.

8. Career Education:

As the online student progresses through their online course, their teacher is available to help the student prepare for employment in a huge number of diverse areas. With the help of their teacher, students will learn to set and achieve goals and will gain experience in making meaningful decisions concerning their career choices. The skills, knowledge and creativity that students acquire through this online course are essential for a wide range of careers. Throughout their secondary school education, students will learn about the educational and career opportunities that are available to them; explore and evaluate a variety of those opportunities; relate what they learn in their courses to potential careers in a variety of fields; and learn to make appropriate educational and career choices.

9. Cooperative Education and Other Workplace Experiences:

By applying the skills they have developed, students will readily connect their classroom learning to real-life activities in the world in which they live. Cooperative education and other workplace experiences will broaden their knowledge of employment opportunities in a wide range of fields. In addition, students will increase their understanding of workplace practices and the nature of the employer-employee relationship. Toronto eLearning School teachers will try to help students link to Ministry programs to ensure that students have information concerning programs and opportunities.

10. Health and Safety:

The study of healthy relationships occurs throughout the social sciences and humanities curriculum. For example, the Dynamics of Human Relationships course provides opportunities for students to explore the topic of healthy relationships and to develop strong social skills and communication strategies. This course also explores the barriers to forming strong, healthy relationships and provides students with important information about how to recognize and respond to unhealthy relationships. The equity studies courses provide opportunities for students to develop their understanding of the ways in which power dynamics are an integral component of all relationships. These courses also allow students to explore the ways in which core aspects of identity - including sex, gender and gender identity, and ethnocultural and religious background - contribute to power dynamics that can facilitate or hinder the formation of healthy relationships.

The knowledge, skills, and habits of mind that are addressed in all courses in social sciences and humanities encourage open-mindedness as well as respect for and deep understanding of self and others, providing a foundation for forming and maintaining healthy relationships.
